SATYAJIT SAHOO

Software Engineer • Full-Stack & Backend • AI/ML Integration
+91 6372754900 | satyajits101@gmail.com | Bhubaneswar, Odisha, India
LinkedIn | GitHub | Portfolio

PROFESSIONAL SUMMARY

Results-driven Software Engineer with 3+ years of experience building scalable SaaS platforms, RESTful microservices, and AI-powered features in production environments. Proven track record delivering backend systems in Python (Flask, FastAPI) and PHP (Laravel) alongside React.js frontends, with hands-on expertise in AWS cloud infrastructure, real-time data workflows, and LLM integrations. Experienced in Agile teams delivering complex features on schedule — well-suited to support Logile's mission of building intelligent retail workforce and operations software.

TECHNICAL SKILLS

Languages: Python, PHP, JavaScript, TypeScript, SQL
Backend Frameworks: FastAPI, Flask, Laravel, Node.js, Express.js, Django, Yii
Frontend: React.js, Vue.js, Tailwind CSS, HTML5, CSS3
Cloud & DevOps: AWS EC2, AWS S3, Git, GitHub, Linux, Docker (basic)
Databases: PostgreSQL, MySQL — schema design, query optimization
APIs & Integrations: RESTful APIs, Stripe, Authorize.net, Unity (game engine), Postman
AI / ML: LLMs, AI Image Generation, Hugging Face pipelines, Image Classification, OpenCV, scikit-learn
Methodologies: Agile / Scrum, Microservices, OOP, MVC, Data Structures & Algorithms

WORK EXPERIENCE

Software Engineer | VirtualTx
August 2024 – Present • Remote

- Architected and deployed React.js + Python (Flask/FastAPI) microservices on AWS EC2 to power a healthcare SaaS platform, managing media assets through AWS S3 for optimized retrieval.
- Built and maintained a bi-directional real-time data integration layer between Unity game engine and a React.js web app, enabling live state synchronization for therapy sessions.
- Engineered LLM-driven AI image generation features allowing users to create custom visual assets from natural language prompts, directly leveraging language model inference pipelines.
- Implemented secure payment subscription workflows using Stripe and Authorize.net, supporting recurring billing for hundreds of active users.
- Designed therapist activity card workflows for clinical session delivery; collaborated with designers and PMs in Agile sprints to ship features on time.

Stack: React.js, Python, Flask, FastAPI, AWS EC2/S3, Unity, Stripe, Authorize.net, Laravel, RESTful APIs

Software Developer | Hyscaler
February 2023 – April 2024 • Bhubaneswar, India

- Engineered a full CRM web application using PHP (Laravel), Vue.js, Tailwind CSS, and PostgreSQL, achieving a measurable 20% improvement in page load times through query optimization and caching strategies.
- Designed and documented end-to-end CRM architecture; led requirement-gathering sessions with stakeholders and improved cross-module data flows.
- Built a comprehensive HR Management System with automated email notification pipelines and social media recruitment API integrations, reducing manual HR overhead.
- Wrote clean, MVC-structured, OOP code; actively participated in code reviews to uphold team quality standards.

Stack: PHP, Laravel, Vue.js, Tailwind CSS, PostgreSQL, MySQL, RESTful APIs, Git

PROJECTS

AI Drawing & Image Analysis Tool — github.com/satyajitdipu/image-classification

- Built a TypeScript/React web app integrating a digital drawing canvas with AI-powered image analysis using Hugging Face models — NSFW detection, image classification, and caption generation.
- Optimized the AI inference pipeline for sub-second response times; added full canvas export functionality.

Vendor Management System — github.com/satyajitdipu/vendor_management

- Developed a Python/Django system for vendor profile management, purchase order tracking, and business analytics dashboards — demonstrating backend data modeling and API design skills.

HR Management System — github.com/satyajitdipu/HR-management

- Engineered a centralized Employee Management System (PHP, Laravel) handling payroll, attendance, and end-to-end recruitment workflows with third-party API automation.

Crop Remodelling & Disease Detection — github.com/satyajitdipu/Crop_Remodelling_and_Disease_Detection

- Designed a Python/Flask smart-farming application with deep learning plant-disease detection, providing crop and fertilizer recommendations from soil analysis data.

E-Commerce Platform — github.com/satyajitdipu/ecom-backend-frontend

- Delivered a full-stack Node.js + React.js + MySQL e-commerce solution with product management, query-optimized search, and payment gateway integration.

E D U C A T I O N

B.Tech in Information Technology *Graduated May 2023 • CGPA: 8.01 / 10*

Sambalpur University Institute of Information Technology (SUIIT), Burla, Odisha, India
